21 July 2026

Subject: Confirmation of deployment of TGF (github.com/Madhvansh/TGF)

To whom it may concern,

This letter is issued to confirm that TGF, an open-source application developed and maintained by Mr. Madhvansh Choksi and hosted at github.com/Madhvansh/TGF, is presently in active operational use at DCM Shriram Alkali. The application was first deployed at the plant in June 2026 independently and has remained in continuous use from 2026.

In its current deployment, TGF is applied to the monitoring and analysis of operations across the four cooling towers at the plant. It has become a part of the routine tooling that our team relies upon for observing tower performance and for reviewing operational data in the course of day-to-day work. Over this period the application has performed dependably in a live plant environment.

This confirmation is provided at the developer's request, for the purpose of documenting the real-world deployment of TGF. It reflects the considered position of the plant's operations and utilities functions, and may be relied upon as an account of the deployment that is independent of the developer's own statements.

Yours faithfully,
Plant Manager, Utility Head
For DCM Shriram Alkali
